November 4, 1996

Andrew Steele, Fire Prevention Officer  
Dayton Fire Department  
300 N. Main Street  
Dayton, OH 45402

Dear Mr. Steele:

Enclosed please find 10 copies of the final Emergency Contingency Plan for the Dayton Electroplate site, located at 1030 Valley Street in Dayton. The plan has been revised with comments provided by the Dayton Fire and Police Departments. Additional changes and revisions to the plan will be made in the event a removal action is initiated at the site by the U.S. EPA or any Potentially Responsible Parties (PRPs). Please distribute copies of the plan to the appropriate local personnel listed on page 3 of the plan.

In addition, I have enclosed a copy of the videotape of the interior of the site for review by Fire Department personnel for training and familiarization of personnel with the site. At this time, MSDS sheets for products within the facility are not available to U.S. EPA. Should this information become available, it will be forwarded to Fire Department representatives. In the event an evacuation of area personnel is required, the U.S. EPA recommends that Local Emergency Planning Commission (LEPC) guidelines be followed.

Please thank all local personnel who participated in the recent meeting held at the Ohio EPA offices regarding the enclosed plan, as well as all personnel who assisted by providing comments. Should you have any questions regarding the contents of the Emergency Contingency Plan, please contact me at the address or telephone number listed above. Any additional questions regarding the site itself should be directed to Steve Renninger of the U.S. EPA at (216)835-5200 or (513)569-7537.

Sincerely,

Karen M. Waldron, P.E.
